APPLICATION NUMBER : 10066533

APPLICANT : TAIHEIYO CEMENT CORP;

INVENTOR : ISHIDA YASUYUKI;

INT.CL. : C04B 28/02 C04B 18/04 //(C04B 28/02 , C04B 18:04 , C04B 22:06 , C04B 7:02 )

TITLE : HYDRAULIC COMPOSITION AND ITS HARDENED BODY

ABSTRACT : PROBLEM TO BE SOLVED: To provide a hydraulic composition and its hardened body free from the deterioration of strength even in the case of adding a large quantity of a waste molten slag to cement, increased in strength over a long period and excellent in durability.

SOLUTION: The hydraulic composition is prepared by blending (A) Portland cement, (B) a slag composition selected from a sewage sludge incineration molten slag, a refuse incineration molten slag, a fly ash molten slag, a crushed stone molten slag and building waste material incineration molten slag and (C) a calcium compound. And, the hardened body is obtained by hardening a mixture containing the hydraulic composition and water.
